

Capicraft Global Creator USD

Class B

As of 2025/08/31

Investment Objective

The principal investment objective of the Fund is to achieve long-term capital appreciation at the risk of moderate to high short term volatility of capital values. The Fund will be a Diversified CIS.

The Fund is aimed at investors with a long-term (5 years or more) investment time horizon. This Fund is best suited for investors who can accept some volatility in capital values within a year but seek returns in excess of U.S long term inflation plus 5 % (in \$ terms) over a rolling 5-year period.

Fund Universe

The Fund will consist of liquid assets, including but not limited to listed equities, bonds, property equity and money-market instruments, preference shares as well as participatory interests in collective investment schemes, including exchange traded funds ("**Collective Investment Schemes**").

Past performance is not a reliable indicator of future results. The portfolio's share prices fluctuate and are not guaranteed. Returns may decrease or increase as a result of currency fluctuations. When making an investment in the portfolio, an investor's capital is at risk. See disclaimer and disclosures for important information regarding this Minimum Disclosure Document.

This fund is a cell of PIM Capital Ltd PCC, duly authorised by the Financial Services Commission (FSC) on the 28th of October 2014 to operate as a Collective Investment Schemes (SEC-3.1 Cv) under section 97 of the Securities Act 2005 with license number C114013528.

Risk Profile

Strategy

To achieve the investment objective noted above, the Fund invests in a well-diversified portfolio consisting of listed equities, bonds, property equity, cash and listed derivative instruments across geographical regions. The cross correlation between asset classes is considered to decrease portfolio risk. Positions sizing is determined by way of probability adjusted return expectations to limit instrument specific risks and improve diversification. The Fund has a capital growth focus, with a flexible asset allocation strategy that seeks to limit the risk of drawdown whilst protecting the portfolio against long term inflation.

Investment Performance

Historical Fees

Total Expense Ratio (TER)	0,8%
Transaction Costs (TC)	0,2%
Total Investment Charge (TIC)	0,9%

Calculated for the 12 month period ending 30 June 2025 and updated quarterly.

Mandate Compliance

The Fund remains compliant with the mandate as at the date of this report.

Glossary

Total Expense Ratio is the total costs associated with managing and operating an investment (excluding administration, financial planning and servicing fees). These costs consist primarily of management fees and additional expenses such as trading fees, legal fees, auditor fees and other operational expenses. The total cost of the fund is divided by the fund's total assets under management to arrive at a percentage amount, which represents the TER.

An equity or share represents an institution/individual's ownership in a listed company and is the vehicle through which they are able to "share" in the profits made by that company. As the company grows, and the expectation of improved profits increases, the market price of the share will increase and this translates into a capital gain for the shareholder. Similarly, negative sentiment about the company will result in the share price falling. Shares/equities are usually considered to have the potential for the highest return of all the investment classes, but with a higher level of risk i.e. share investments have the most volatile returns over the short term. An investment in this type of asset should be viewed with a 7 to 10 year horizon.

Volatility is a statistical measure of the dispersion of returns for a given security or market index.

Tracking error is a measure of the risk in an investment portfolio that is due to active management decisions made by the portfolio manager; it indicates how closely a portfolio follows the index to which it is benchmarked.

Information ratio, is a measure of the risk-adjusted return of a portfolio. In this case, it measures the active return of the manager's portfolio divided by the amount of risk that the manager takes relative to the benchmark.

Sharpe Ratio is a measure for calculating risk-adjusted return. It is the average return earned in excess of the risk-free rate per unit of total risk. The greater a portfolio's Sharpe ratio, the better its risk-adjusted performance has been (i.e. a higher return with a contained risk profile, where the portfolio manager is not taking excessive risk to achieve those returns).

Beta is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole.

Alpha is a measure of the active return on an investment. It represents the excess returns of a fund relative to the return of a suitable benchmark.

Market Risk Equity markets are volatile and the price of equities fluctuate based on a number of factors such as changes in the economic climate, general movements in interest rates and the political and social environment which will also affect the value of the securities held in the unit trust, thereby affecting the overall value of the CIS.

Currency Risk / Foreign Exchange Risk This risk is associated with investments that are denominated in foreign currencies. When the foreign currencies fluctuate against the USD, the investments face currency gains or losses.

Concentration Risk CIS investment vehicle pools the assets of many investors and use the proceeds to buy a portfolio of securities. There are regulations in place which limit the amount that a CIS may invest in securities, thereby spreading the risk across securities, asset classes and companies.

Liquidity Risk This relates to the ability of the CIS to trade out of a security held in the portfolio at or near to its fair value. This may impact on liquidity and in the case of foreign securities, the repatriation of funds.

Inflation Risk The risk of potential loss in the purchasing power of your investment due to a general increase of consumer prices.

Political Risk The risk that investment returns could suffer as a result of a country's political changes or instability in the country. Instability could come from changes in the country's government, policy makers or military.

Tax Risk This risk relates to any change to tax laws or to the interpretation of existing tax laws which has an impact on the manner in which unit trusts are taxed.

Compliance Risk This refers to the risk of not complying with the legislation, regulations, prescribed investment limits and internal policies and procedures by the manager or the portfolio manager.

Disclaimer

This fund is a cell of PIM Capital Ltd PCC, duly authorised by the Financial Services Commission (FSC) on the 28th of October 2014 to operate as a Collective Investment Schemes (SEC-3.1 Cv) under section 97 of the Securities Act 2005 with license number C114013528. PIM Capital Fund Services is registered with the Financial Services Commission under section 72(6) of the Financial Services Act as a Collective Investment Schemes Manager, in Mauritius. Prime Collective Investment Schemes Management Company (RF) (Pty) Ltd ("Prime CIS") is a registered Collective Investment Schemes Manager under section 5 of the Collective Investment Schemes Control Act (CISCA) and is the South African representative office for this fund. Prime CIS is a wholly owned subsidiary of Prime Financial Services (Pty) Ltd a full member of the Association for Savings & Investment SA (ASISA). For more information on the South African representative please visit www.primeinvestments.co.za.

Capicraft Investment Partners (Pty) Ltd is an authorised financial services provider in terms of the Financial Advisory and Intermediary Services Act (No. 37 of 2002) with FSP number 46098.

Peresec International Limited has been appointed as the fund's trustee/custodian. The fund is approved under section 65 of CISCA by the Financial Sector Conduct Authority of South Africa.

The distribution of this document and the offering of shares may be restricted in certain jurisdictions. It is the responsibility of any person in possession of this document to inform themselves of, and to observe, all applicable laws and regulations of any relevant jurisdictions. Prospective applicants for shares should inform themselves as to the legal requirements and consequences of applying for, holding and disposing of shares and any applicable exchange control regulations and taxes in the countries of their respective citizenship, residence or domicile. This document does not constitute an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not lawful or in which the person making such offer is not qualified to do so to anyone to whom it is unlawful to make such offer or consolidation. This Fact Sheet is for informational purposes only and does not constitute investment, legal, tax or other advice or any recommendation to buy or sell the securities herein mentioned. Independent professional financial advice should always be sought before making an investment decision as not all investments are suitable for all investors. If you choose to appoint an adviser, advice fees are contracted directly between you and the adviser.

Collective Investment Schemes (CISs) are generally medium to long term investments. The value of participatory interests or the investment may go down as well as up, and therefore, the CIS Manager does not make guarantees with respect to the protection of capital or returns of the investment. Past performance is not necessarily a guide to future performance. CISs are traded at ruling process and can engage in borrowing and scrip lending. The portfolio may include underlying foreign investments, and may as a result be exposed to macroeconomic, political, foreign exchange, tax, settlement, reporting or illiquidity risk factors that may be different to similar investments in South African markets. The underlying foreign investments may also be adversely affected by foreign investment policies, restrictions on repatriation of investments and other restrictions and controls that may be imposed by the relevant authorities of the relevant countries. The CIS Manager reserves the right to close the fund to new investors if it is necessary to limit further inflows for it to be managed in accordance with its mandate. Investors in the Fund are not protected by any statutory compensation arrangements in Mauritius in the event of the fund's failure. The Mauritius Financial Services Commission does not vouch for the financial soundness of the fund or for the correctness of any statements made or opinions expressed regarding it. In certain circumstances, a participant's right to redeem his shares may be suspended. Applicants are assumed to have read and understood the Prospectus and accept the risk of an investment in PIM Capital Limited PCC. It is understood that they are aware that the portfolio of securities is subject to market fluctuations and to the risks inherent in all investments, and that the price of shares and any income from the shares may go down as well as up, and that the fund may be subject to volatile price movements which may result in capital loss.

Past performance does not predict future returns. No guarantee is provided, either with respect to the capital or the return of the fund. The value of participatory interests or the investments may fluctuate in value and may fall as well as rise. A schedule of fees, charges, maximum commissions, and a detailed description of performance fee calculation and application is available on request. Daily unit pricing and performance is available on Bloomberg. NAV to NAV figures have been used. Investment performance is for illustrative purposes only. Excessive withdrawals from the fund may place the fund under liquidity pressure and in such circumstances, a process of ringfencing withdrawal instructions and managed payouts may be followed. Commission and incentives may be paid and if so, these will be included in the overall costs. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Fund valuations take place at approximately 12h00 (MUT) each business day and forward pricing is used. Instructions must reach the manager before 16h00 (MUT) one day prior to the dealing date. You can expect to receive withdrawal payouts five business days after valuation distribution. Large investments or redemptions (exceeding 5% of fund value) may be subject to an anti-dilution levy to defray dealing costs and expenses. This levy, where applicable, is applied fully for the benefit of the fund. A schedule of fees and charges and maximum commissions is available on request from the CIS Manager.

Dealing prices are calculated on a net asset value and auditor's fees, bank charges and trustee fees are levied against the portfolios. Performance may differ as a result of initial fees, the actual investment date, and the date of reinvestment. The investment performance is for illustrative purposes only. The investment performance is calculated after taking the actual initial fees and all ongoing fees into account. The reinvestment of income is calculated on the actual amount distributed per participatory interest by using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual reinvestment date. The value of participatory interests or the investment may go down as well as up. The CIS Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. All CIS are traded at ruling prices and can engage in borrowing and scrip lending. Income is reinvested on the investment date. The CIS Manager has the right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate.

Mandatory cost disclosure as per the regulator: USD 6,750 p.a. Audit fee. USD 600 p.a. annual FSC fees. A schedule of fees and charges, maximum commissions and a schedule of similarities and differences is available on request from the CIS Manager.

Total Expense Ratio (TER) is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the fund are included. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs (TC) is necessary in managing the fund and impacts the fund's return. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The Total Investment Charge (TIC) is the sum of the Total Expense Ratio (TER) and Transaction Costs (TC).

This is a Minimum Disclosure Document (MDD) and any attachments to it constitute factual and objective information about the fund, and nothing contained herein should be construed as constituting any form of investment advice or recommendation, guidance or proposal of a financial nature in respect of any investment issued by PIM Capital Limited PCC. Opinions expressed in this document may be changed without notice at any time after publication. We, therefore, disclaim whatsoever liability for any loss, damage (whether direct or consequential) or expense of any nature whatsoever which may be suffered as a result of, or which may be attributable, directly or indirectly, to the use of or reliance upon the information. Additional information such as daily fund prices, brochures, applicable forms and a schedule of fund fees and charges is available on request from the CIS Manager.
